

How to Make a Plastic Bag Holder

Seth Custer
Paul Gralewski
Erica Voss

In this project, you will create a plastic bag holder that can be used to store plastic bags you get from the store for later use.

You will also learn the basics about sewing, which you can use for future sewing projects.

This project takes approximately 1 to 1½ hours to complete.

Caution: This project requires a sewing machine and an iron. If you have not used either before or are unsure of how to use them, please ask the 4-H leaders for help.

Materials Needed

- 1 kitchen towel
- 1 yard of 1/4-inch ribbon
- 2 feet of elastic
- Scissors
- Pins
- Sewing needles
- Thread that matches the background of your towel
- Sewing machine
- Iron
- Ironing board
- Ruler
- Pencil

Let the Sewing Begin!

Step 1

- A) Cut two pieces of elastic a little bit longer than half of the **width** of the towel.

Width—the shorter side of the towel

- B) Test to make sure you can stretch the elastic along the **width** of the towel. If it is too hard to get it to both ends of the towel, then cut a longer piece of elastic.

Note: Buy a little more elastic than you need—working with elastic is a bit tricky and you may need to experiment with the measurements.

Step 2

A) Open towel to the **wrong side**.

Wrong side—the side of the towel that will be on the inside

Step 3

A) Use a pencil to make a straight line across both ends of the towel.

Note: If you choose a plaid pattern, as shown in the example, you can use the print as a line.

Step 4

A) Take the pieces of elastic you cut and mark where the center of the elastic is.

B) Now pin the elastic to the towel to help keep the elastic in a straight line when sewing it using the sewing machine.

- Pin one end of the elastic on top of the line you just drew. Make sure the end of the elastic goes about $\frac{1}{2}$ inch past the edge of the towel.
- Pin the middle of the elastic (your mark) to the middle of the towel (as shown in the second image on the left).

- c. Finally, pin the last edge of the elastic to the other edge of the towel. Remember to pin it so $\frac{1}{2}$ inch of the elastic hangs off the edge.

Note: Feel free to fold the towel a bit to make the pinning process easier.

- C) At the points you have pinned the elastic down, **baste** the elastic to the towel to hold it in place.

Baste—to sew with long loose stitches in order to hold something in place temporarily

Note: Make sure you stretch the elastic before **basting** each section to ensure that the elastic and the towel are in the correct places to be sewn together.

Note: You may want to use bright thread to help you see where to sew.

- D) Use the sewing machine to stitch the elastic onto the towel.
 - a. First start by **backstitching** the elastic on to ensure the elastic is in place.
 - b. Next stretch the elastic from the edge to the center of the towel and zigzag from the edge to the center point.
 - c. Stretch elastic from the center to the edge and complete the rest of the zigzag stitching.
 - d. Secure the final end with a **backstitch**.

Backstitch—stitching forward and backward for several stitches to secure the thread so it doesn't pull out.

E) Repeat this entire step on the other end of the towel.

Step 5

A) Right sides together, fold the towel lengthwise so both **selvages** are together. Pin in place. **Baste** seam together if needed.

Selvage—the finished edges of a piece of fabric that do not ravel

B) Machine stitch a $\frac{1}{2}$ -inch seam from one end of the towel to the other end. **Backstitch** at the beginning and end of seam.

C) Press the newly created seam flat.

D) Turn the newly formed tube inside out so that the right side is showing.

E) **Press** the seam on the right side.

Press—using an iron with steam just gently lift the iron up and down on the fabric, not side to side.

Step 6

- A) Cut 8 inches of ribbon and make a loop by folding it in half.
- Stitch it in place at the center of the seam about $\frac{1}{2}$ –1 inch from the top edge.
 - Machine stitch the loop in place by sewing over it several times to hold it in place.
 - Clip the extra thread.

- B) With the rest of your ribbon tie a bow. This bow can then be attached for decoration to the front of your tube.

Step 7

The holder is now finished! Stuff plastic bags in the top and pull them from the bottom when you need them. This new plastic bag holder is handy in any kitchen and makes a great gift too!

This new plastic bag holder will be a great addition to any household kitchen!

Glossary

Width—the shorter side of the towel

Right Side—side where the image is the clearest

Wrong Side—opposite of the right side of the towel

Basting—to sew with long loose stitches in order to hold something in place temporarily

Backstitching—stitch that is sewn one stitch length backward on the front side (right side) and two stitch lengths forward on the reverse side (wrong side) to form a solid line of stitching on both sides

Press—using an iron with steam, gently lift the iron up and down on the fabric rather than sliding the iron back and forth on the material

Selvage—the finished edges of a piece of fabric that do not ravel
